

Assignment - Student Management System

Classes (mainly) - Student | ^(teacher) Teacher | Academic | Course (modules)
Results?

• Create Students	• Statistics class - contents Att Index
• Delete Students	• Splash Screen.
• Create Modules	
• Delete Modules	
• Add Student to module	• Remove Student from module
• create/delete tutors/Academics	

• Display class - Shows all Students/tutors/Academics (combobox + listbox)
• Add new user/person - will give the user the option to create a new 'person' where they can select whether it be a Student, tutor or academic. Once selected they'll be prompted to the relevant data fields.

Post Plan:

* How many modules can Students have? - 3

* Module class listbox?

Add new
Person

Add Details
